

The diagram illustrates a soccer field with 20 players, numbered 1 through 20. The field is bounded by a black line. A vertical dashed line in the center represents the goal line, with 'Start' and 'Finish' labels and red arrows indicating movement. A green goal is located on the right side. A red arrow on the left side indicates 'In / Out' movement. Two dashed lines show player movement paths: one from player 6 to player 14, and another from player 5 to player 10. Player positions are marked with red dots and numbers, with some players having additional symbols (circles, arrows) indicating their movement or status.
